Notes: To calculate pieces required, multiply the wall length, in feet, by 1.72. This will give you the number of pieces required per layer. Then multiply this by the number of layers to determine total quantity required. Please note that 1.72 is the multiplier used for both the standard and coping units. It's recommended to go a maximum of 2' height. Minimum inside diameter of 42" (23 pieces). A \$25.00 returnable pallet fee will be charged to any bundle of StackStone.
